QUALIFICATIONS

- Coding desktop and web applications since 1992.
- Developed a large scale social-networking site (YouN00b.com) utilizing original code (no-pre-existing modules) including: user profiles, forum, contribution tracking, auctions, moderation and administration, article submissions, bug tracking, site messaging, RSS, notifications, feature recommendations, sitemap generator and more.
- Authored three white papers on web application security.

EXPERIENCE

- **YouN00b.com** August 2006 - Present

Social networking site with more than 160 users, 48,000 posts, over 2,500 topics. YouN00b is still growing today. Site attracts guests from 56 countries, and enjoys over 5,000 page views per day.

- **IllinoisBenefits.com** January 2010 - May 2010 [Internship]

Generate graphics and front-end programming to create a site from the ground up. Includes a contact form using PHP, as well as includes for layout (headers and footers).

- **Convergent Technologies** June 2010 - Present

Design and developed a service specialist dispatch board and scheduler (web-based), contract management system, and interfaced with existing management infrastructure.

EDUCATION *(Certification and Education: http://www.robert-lerner.com/certificates_and_education.php)*

- Currently pursuing an Associate of Sciences in Web Design and Administration with a 4.0 grade point average at Joliet Junior College.
- Hold certifications in XHTML, PHP and CSS through ExpertRating.com

ACHIEVMENTS *(Accomplishments: <http://www.robert-lerner.com/accomplishments.php>)*

- Presented Internet security scenarios relating to server-side engineering to a class at Joliet Junior College.
- Authored over 2,000,000 lines of code, starting at the age of seven in Microsoft QBasic.
- Developed Convergent's "iPlan" system, a web based scheduler that is in use at 26 locations around North America, and is instrumental in the companies' projected 300% growth of their service sector by 2014. iPlan handles the dispatching of security specialists for 800 Capital One locations, as well as Microsoft, Intel, and the United States Army.
